When we think of summer, we often think of bright, sunny days and time away from our usual pursuits. We all need to take some time periodically to slow down and relax. Not having a set schedule is appealing in so many ways. What do you dream about in the summer? Could you take that dream and fine-tune it into a goal you would like to accomplish? Remember, it's summer, so make your goal fun and just a little bit challenging. Take a look at some of the goals the ETS staff has for the summer.

**LISA** – One of my summer goals is to expand my outdoor herb garden. I plan to add oregano and multiple varieties of basil and rosemary.

**ZACH** – My summer goal is to work out at least once a day.

**ALLYSON** – My goal is to find a new creative project. I'm thinking about starting a blog to document my crafty pursuits!

**EMILY** – One of my summer goals is to travel. I have a friend who moved to Germany and I'd love to go visit and explore with her. It's something I've been wanting to do for a while and now seems like the perfect time!

**SHELBY** – This summer I will be participating in Northern Kentucky University's new community garden. I hope to successfully grow tomatoes, cucumbers, and peppers.

**HAVE A GREAT SUMMER BREAK!**
